Introduction

Why Beamer?

Theorem

Let $v \in \mathbb{R}^n$. Then, there exists $w \perp v$, that is

$$\sum_{i=1}^n v_i w_i = 0.$$

Why Custom Themes?

- ❖ The default Beamer themes are outdated and visually displeasing
- ❖ There aren't many Beamer themes readily available online
- ❖ Making custom Beamer themes is easy!

Conclusions

Closing Thoughts

Woo, Beamer!
